Professional Summary

Full Stack Developer with hands-on experience building and maintaining production-ready web and mobile applications using the MERN stack. Strong experience in developing backend services with Node.js, Express, and Strapi, designing RESTful APIs, and implementing authentication and role-based access control. Passionate about clean architecture, scalable system design, and writing maintainable, high-quality code.

Technical Skills

Languages: JavaScript (ES6+), TypeScript
Frontend: HTML5, CSS3, Bootstrap, Tailwind CSS, React.js, Next.js, Material-UI
Backend: Node.js, Express.js, Strapi (Headless CMS), RESTful APIs, JWT Authentication, RBAC
Databases: MongoDB, PostgreSQL, MySQL, Firebase Realtime Database
Tools & Platforms: Git, GitHub, Postman, VS Code, Vercel, Render, AWS (S3, Lambda)
Practices: Clean Architecture, SOLID Principles, Atomic Design

Professional Experience

Junior Software Engineer

Mar 2025 – Present

Geesesquads Software Services Private Limited

- Developed and maintained full-stack features using React, Node.js, Express, and Strapi for production systems.
- Designed and implemented RESTful APIs with JWT-based authentication and role-based access control.
- Integrated backend services for user management, payment workflows, and administrative operations.
- Collaborated with senior engineers to debug issues, optimize performance, and improve code quality.
- Applied clean architecture and SOLID principles to improve scalability and long-term maintainability.

Training & Internship

Full Stack Development (MERN Stack)

2024 – Mar 2025

Luminar Technolab

- Completed intensive hands-on training and internship focused on MERN stack development.
- Built full-stack MERN applications including a Movie Booking application and ProjectFair application.
- Developed REST APIs, implemented authentication, and role-based access control.

Projects

Vehicle Inventory Management System - TypeScript, React.js, Node.js, Strapi

- Developed a full-stack inventory management system to track vehicle availability and lifecycle.
- Implemented role-based access control for Admin, Sales Manager, and Maintenance users.
- Built backend services using Strapi and custom REST APIs.
- Integrated JWT authentication and AWS storage for secure document and asset management.

Storage Rental Management System - TypeScript, React.js, Node.js, Strapi, AWS Lambda, Fygaro payment

- Developed a full-stack storage rental platform to manage units, prospects, future tenants, and active tenants.
- Designed and implemented a customer lifecycle flow from prospect to tenant based on payment and lease completion.
- Integrated Fygaro payment link generation and automated email notifications for secure payment processing.
- Implemented lease agreement generation, digital signing workflow, and automatic unit assignment upon completion.
- Building an admin panel with role-based access control (RBAC) for secure system administration.

Earlier Experience

Electronics Technician

2017 – 2020

- Performed installation, troubleshooting, and maintenance of electronic systems.
- Developed strong analytical, debugging, and problem-solving skills transferable to software development.

Education

Bachelor of Technology (B.Tech) in Information Technology

2020 – 2023

APJ Abdul Kalam Technological University

CGPA: 6.64

Diploma in Mechatronics Engineering

2014 – 2017

Percentage: 65%
